CLINICAL REFERENCE LIST
Validation & Testing:

   Meconium and transitional stools may cause interference with near-infrared spectroscopy measurements of intestinal oxygen saturation in preterm infants. 

2. Said M, Niforatos N, Rais-Bahrami K. 
   Testing a new NIRS method to measure regional mesenteric tissue oxygen saturation in preterm infants that compensates for meconium and transitional stool interference. 
   Department of Neonatology, Children’s National Medical Center, Washington, DC, USA. 

   NIRS Abdominal Somatic Tissue Oxygen Saturation Validation Model for Neonates ≤ 4kg. 
   Department of Neonatology, Children’s National Medical Center, Washington, DC, USA. 
   E-PAS2012:1534.582.

   Comparison of NIRS Traditional Vs Stool Compensating Somatic Algorithms When Measuring Abdominal Tissue Oxygen Saturation on Neonates ≤ 4kg. 
   Department of Neonatology, Children’s National Medical Center, Washington, DC, USA. 

5. Bickler PE, Feiner JR, Eilers H, Rollins M. 
   Performance of 5 cerebral oximeters during hypoxia in healthy volunteers. 
   Presented at American Society of Anesthesiologists Annual Meeting 2011 #LBT07.

   Validation of the FORE-SIGHT Tissue Oximeter for measurement of somatic oxygenation in children. 
   Department of Anesthesiology, Perioperative & Pain Medicine, Children's Hospital Boston and Harvard Medical School, Boston, MA, USA. 
   Presented at American Society of Anesthesiologists Annual Meeting 2011 #A1454.

7. Said M, Niforatos N, Rais-Bahrami K. 
   Validation of flank NIRS somatic tissue oxygen saturation measurements on neonates 4 kg or less. 
   Presented at the American Academy of Pediatrics 2010 #14989.

8. Zaouter C, Arbeid E. 
   Influence of ambient light on cerebral oximeters. 

9. Ing RJ, MacLeod DB, Ikeda K, Ames WA, Schulman SR. 
   Measurement of absolute viscerosomatic tissue oxygen saturation: preliminary results. 
   Department of Anesthesiology, Duke University Medical Center, Durham, NC, USA. 
   Presented at Society for Pediatric Anesthesia 2010.

10. Kussman BD, Laussen PC, Benni PB, McElhinney DB, McGowan FX. 
    Validation of the FORE-SIGHT pediatric NIRS cerebral oximeter. 
    Department of Anesthesiology, Perioperative & Pain Medicine, Children's Hospital Boston and Harvard Medical School, Boston, MA, USA. 
11. MacLeod DB, Ikeda K, Vacchiano C.  
   Absolute and trending accuracy of FORE-SIGHT and INVOS cerebral oximeters in healthy volunteers.  
   Department of Anesthesiology, Duke University Medical Center, Durham, NC, USA.  

12. MacLeod DB, Ikeda K, Vacchiano C.  
   Simultaneous comparison of FORE-SIGHT and INVOS cerebral oximeters to jugular bulb and arterial CO-oximetry measurements in healthy volunteers.  
   Department of Anesthesiology, Duke University Medical Center, Durham, NC, USA.  

13. MacLeod DB, Ikeda K, Keifer JC, Moretti E, and Ames W.  
   Validation of the CAS Adult Cerebral Oximeter during hypoxia in healthy volunteers.  
   Department of Anesthesiology, Duke University Medical Center, Durham, NC, USA.  

   Validation of a noninvasive neonatal optical cerebral oximeter in veno-venous ECMO patients with a cephalad catheter.  
   Department of Neonatology, Children's National Medical Center, Washington, DC, USA.  

   Validation of the CAS neonatal NIRS system by monitoring vv-ECMO patients: preliminary results.  

16. Benni PB, Chen B, Dyckman W, Morgan E.  
   Animal model validation of the CAS neonatal NIRS System, including effects of extracerebral interference.  
   CAS Medical Systems, Branford, CT, USA; Hartford Hospital, Hartford, CT, USA.

 Activation and entrainment mapping of hemodynamically unstable ventricular tachycardia using a percutaneous left ventricular assist device. 
Mount Sinai School of Medicine, New York, NY, USA. 

The incidence of cerebral desaturation events in the intensive care unit (ICU) following cardiac surgery. 
NorthShore University Health System, Evanston, IL, USA. 
Presented at American Society of Anesthesiologists Annual Meeting 2011 #A1454.

34. Lathouwers K, De Deyne C, Jans F, Meex I, De Sloovere V, Heylen R. 
Non-invasive monitoring of absolute cerebral tissue oxygen saturation (FORE-SIGHT technology) in healthy volunteers. 
Departments of Anesthesia and Neurosurgery, Ziekenhuis Oost-Limburg, Genk, Belgium. 
Presented at Society of Neurosurgical Anesthesia and Critical Care 2011.

35. Lathouwers K, De Deyne C, Jans F, Meex I, De Sloovere V, Heylen R. 
Monitoring of effect of supplemental oxygen administration during locoregional anesthesia on cerebral oxygenation as measured by NIRS (FORE-SIGHT technology). 
Departments of Anesthesia and Neurosurgery, Ziekenhuis Oost-Limburg, Genk, Belgium. 
Presented at Society of Neurosurgical Anesthesia and Critical Care 2011.

36. Meex I, De Deyne C, Jans F, Dens J, Lathouwers K, Heylen R. 
Cerebral oxygenation measured by NIRS FORE-SIGHT technology reveals adequacy of cerebral perfusion during cardiopulmonary resuscitation. 
Presented at Society of Neurosurgical Anesthesia and Critical Care 2011.

37. Meex I, De Deyne C, Dens J, Lathouwers K, Heylen R. 
Shivering during induced hypothermia after cardiac arrest results in significant decrease in non-invasive cerebral oxygen saturation, as measured by near infrared spectroscopy. 
Presented at Society of Neurosurgical Anesthesia and Critical Care 2011.
43. Martens PR, Dhaese HL, Van den Brande FG, Van Laecke SM.
External cardiac massage improved cerebral tissue oxygenation shown by near-infrared spectroscopy during transcatheter aortic valve implantation.

Real-time continuous monitoring of cerebral blood flow autoregulation using near-infrared spectroscopy in patients undergoing cardiopulmonary bypass.

45. Highton D, Elwell C, Smith M.
Noninvasive cerebral oximetry: is there light at the end of the tunnel?
The National Hospital for Neurology and Neurosurgery, University College London Hospitals, London, UK.

46. Henick WP, Mathews DM, Mellor A, Reich NT, Neuman GG.
Phenylephrine bolus given to treat hypotension decreases cerebral oxygen saturation.
Anesthesiology, St. Vincent’s Catholic Medical Center, New York, NY, USA.
Presented at American Society of Anesthesiologists Annual Meeting 2010 #A396.

47. De Naeyer S, De Deyne C, Lansink W, Vercauteren M, Heylen R.
Non-invasive absolute cerebral oximetry (FORE-SIGHT Technology) during carotid endarterectomy.
Department of Anaesthesiology, Ziekenhuis Oost-Limburg, Genk, Belgium

Decrease of cerebral oxygen saturation in prone position during spine surgery measured by absolute cerebral oximetry.
Department of Anesthesia, McGill University, Montreal General Hospital, Montreal, Quebec, Canada.
Presented at American Society of Anesthesiologists Annual Meeting 2010 #LB07.
49. Weiner MM, Fischer GW, Torillo TM, Lin HM, Rosenblatt MA. 
The effect of anesthetic technique on cerebral oxygenation in the beach chair position. 
Department of Anesthesiology, Mount Sinai School of Medicine, New York, NY, USA. 

Non-invasive cerebral oxygen saturation during beach chair positioning in healthy volunteers. 
Department of Anesthesiology, Ziekenhuis Oost-Limburg, Genk, Belgium and Faculty of Medicine, Hasselt University, Hasselt, Belgium. 
Presented at American Society of Anesthesiologists Annual Meeting 2010 #A1686.

Beach chair positioning results in significantly lower cerebral oxygen saturations. 
Department of Anesthesiology, Ziekenhuis Oost-Limburg, Genk, Belgium and Faculty of Medicine, Hasselt University, Hasselt, Belgium. 
Presented at American Society of Anesthesiologists Annual Meeting 2010 #1688.

52. Espenell AE, McIntyre IW, Gulati H, Girling LG, Wilkinson MF, Silvaggio JA, Koulack J, West M, Harding GE, Kaufmann AM, Mutch WA. 
Lactate flux during carotid endarterectomy under general anesthesia: correlation with various point-of-care monitors. 
Department of Anesthesia, University of Manitoba, Winnipeg, MB, Canada. 

Influence of steep trendelenburg position and CO₂ pneumoperitoneum on cardiovascular, cerebrovascular, and respiratory homeostasis during robotic prostatectomy. 
Department of Anesthesiology, University Medical Center Groningen, University of Groningen, The Netherlands. 

Cerebral oxygen desaturation events assessed by near-infrared spectroscopy during shoulder arthroscopy in the beach chair and lateral decubitus positions. 
Department of Anesthesiology, NorthShore University HealthSystem, Evanston, IL, USA. 

Cerebrovascular reactivity (by CO₂ challenge) can be monitored by non-invasive absolute cerebral oxygen saturation (FORE-SIGHT Technology). 

Monitoring of absolute cerebral oxygen saturation (FORE-SIGHT Technology) during endoscopic shoulder surgery: beach chair positioning or conventional side positioning. 

57. Ramakers F, De Deyne C, Jans F, Vandermeersch E, Heylen R. 
New technology of non-invasive cerebral oximetry (FORE-SIGHT Technology) to monitor cerebral perfusion during resuscitation from cardiac arrest (CPR). 

Non-invasive absolute cerebral oximetry and intraluminal shunting during carotid endarterectomy. 
Department of Anesthesiology, Ziekenhuis Oost-Limburg, Genk, Belgium and Faculty of Medicine, Hasselt University, Hasselt, Belgium. 
Presented at American Society of Anesthesiologists Annual Meeting 2010 # A398.
Postoperative monitoring of non-invasive cerebral oxygen saturation after carotid endarterectomy.

60. Prihadi E, De Deyne C, Truijen J, Jans F, Heylen R.
Acute peripheral oxygen desaturation does not result in significant decreases in cerebral oxygen saturation.

Monitoring of absolute cerebral oxygen saturation during induction of general anesthesia.
Department of Anesthesiology, Ziekenhuis Oost-Limburg, Genk, Belgium

Mathematical model for describing cerebral oxygen desaturation in patients undergoing deep hypothermic circulatory arrest.
Department of Anesthesiology and Cardiothoracic Surgery, Mount Sinai Medical Center, New York, NY, USA.

Impaired autoregulation of cerebral blood flow during rewarming from hypothermic cardiopulmonary bypass and its potential association with stroke.
Department of Anesthesiology and Critical Care Medicine, The Johns Hopkins University School of Medicine, Baltimore, Maryland, USA.

64. Kazan R, Bracco D, Hemmerling TM.
Reduced cerebral oxygen saturation measured by absolute cerebral oximetry during thoracic surgery correlates with postoperative complications.
ITAG (Intelligent Technology in Anaesthesia Group), Department of Anaesthesiology, Montreal General Hospital, McGill University, Montreal, Canada.

65. Lathouwers KM, De Deyne CS, Mestrum R, Lauwers G, Heylen RJ.
Non-invasive absolute cerebral oximetry (FORE-SIGHT) during shunting procedure for carotid surgery.
Department of Anesthesiology, Ziekenhuis Oost-Limburg, Genk, Belgium.

66. Brijen L, Joshi BL, Brady K, Hogue CW.
Real time monitoring of cerebral blood flow autoregulation with NIRS during cardiac surgery.
Departments of Anesthesiology & Critical Care Medicine, The Johns Hopkins Medical Institutions, Baltimore, MD, USA.

67. Lathouwers KM, De Deyne CS, Lansink W, Mestrum R, Heylen RJ.
Non-invasive absolute cerebral oximetry (FORE-SIGHT) during carotid endarterectomy.
Department of Anesthesiology, Ziekenhuis Oost-Limburg, Genk, Belgium.

68. Lathouwers KM, De Deyne CS, Jans F, Truijen J, Heylen RJ.
Absolute cerebral oximetry (FORE-SIGHT) in beach chair positioning for shoulder surgery.
Department of Anesthesiology, Ziekenhuis Oost-Limburg, Genk, Belgium.
Non-invasive monitoring of brain oxygen saturation during temporary clipping applied for complex cerebral aneurysm surgery.
Departments of Anesthesia and Neurosurgery, Ziekenhuis Oost-Limburg, Genk, Belgium. 
Presented at Society of Neurosurgical Anesthesia and Critical Care 2009.

Non-invasive absolute cerebral oximetry: a new guide during carotid endarterectomy?
Departments of Anesthesia and Cardiothoracic Surgery, Ziekenhuis Oost-Limburg, Genk, Belgium. 
Presented at Society of Neurosurgical Anesthesia and Critical Care 2009.

Minimal invasive supra-orbital incision for cerebral aneurysm clipping: implications for anesthesia management.
Departments of Anesthesia and Neurosurgery, Ziekenhuis Oost-Limburg, Genk, Belgium. 

Monitoring of non-invasive absolute brain oxygen saturation to detect cerebral hyperperfusion after carotid endarterectomy.
Departments of Anesthesia and Cardiothoracic Surgery, Ziekenhuis Oost-Limburg, Genk, Belgium. 

Non-invasive monitoring of brain oxygenation for complex cerebral aneurysm surgery.
Department of Neurosurgery and Anesthesiology, Ziekenhuis Oost-Limburg, Genk, Belgium. 

Monitoring of absolute cerebral oxygen saturation during craniotomy for acute intracerebral bleeding.
Departments of Anesthesia and Neurosurgery, Ziekenhuis Oost-Limburg, Genk, Belgium. 

75. Lathouwers KM, De Deyne CS, Jans F, Crits T, Vundelinckx G, Heylen RJ. 
New technology of non-invasive cerebral oximetry to assess cerebral perfusion during resuscitation from cardiac arrest (CPR).
Departments of Anesthesia and Neurosurgery, Ziekenhuis Oost-Limburg, Genk, Belgium. 
Presented at the 5th Mediterranean Emergency Medicine Conference.

76. Lamote S, De Deyne CS, Lansink W, Jans F, Heylen R. 
Non-invasive monitoring of absolute cerebral oxygen saturation during elective shunting procedure for carotid endarterectomy.
Departments of Anesthesiology and Cardiothoracic Surgery, Ziekenhuis Oost-Limburg, Genk, Belgium. 

77. Dylst D, De Deyne CS, Weyns F, Jans F, Heylen R. 
Monitoring of absolute cerebral oxygen saturation during craniotomy for acute intracerebral bleeding.
Departments of Anesthesiology and Neurosurgery, Ziekenhuis Oost-Limburg, Genk, Belgium. 

78. Somers R, De Deyne CS, Jans F, Oosterbosch J, Heylen R. 
Monitoring of absolute cerebral oxygen saturation during endoscopic shoulder surgery: Benchchair positioning compared to conventional positioning.
Departments of Anesthesiology and Orthopedic Surgery, Ziekenhuis Oost-Limburg, Genk, Belgium. 
**Monitoring of brain oxygenation during complex cerebral aneurysm surgery by FORE-SIGHT.**  
Departments of Anesthesiology and Neurosurgery, Ziekenhuis Oost-Limburg, Genk, Belgium.  

**Monitoring of brain oxygenation during hyperthermic intraperitoneal chemotherapy (HIPEC) procedures.**  
Departments of Anesthesiology and Abdominal Surgery, Ziekenhuis Oost-Limburg, Genk, Belgium.

Neonatology, Children’s National Medical Center, Washington, DC; Neonatology, The George Washington University School of Medicine, Washington, DC, USA.  
*Presented at Pediatric Academic Societies 2010.*

Comparison of simultaneous cerebral oximeter and pulse oximeter data in preterm infants with RDS.  
Neonatology, Children’s National Medical Center, Washington, DC, USA.  
*Presented at Pediatric Academic Societies 2010.*
32. Gilmore MM, Stone B, Shepard J, Brady KM.  
**Gestational age + 5? Monitoring autoregulation in the preterm infant.**  
Pediatrics, Johns Hopkins University, Baltimore, MD; Anesthesia & Critical Care Medicine, Johns Hopkins University, Baltimore, MD, USA.  
*Presented at Pediatric Academic Societies 2010.*

33. Kimura RE, Chen Y.  
**NIRS technology detects a decrease in intestinal blood flow caused by hypovolemia.**  
Pediatrics, Rush University, Chicago, IL, USA.  
*Presented at Pediatric Academic Societies 2010.*

34. Munkeby BH, Kro GAB, Saugstad OD.  
**Accuracy of hepatic oxygenation monitoring by NIRS in newborn pigs.**  
Department of Pediatric Research, Rikshospitalet Medical Center, University of Oslo, Oslo, Norway.  
*Presented at Pediatric Academic Societies 2010.*

35. Drinkaus R, Taenzer A, Cravero J.  
**Near infrared Spectroscopy values during painful procedures in newborn – correlation with behavioral markers.**  
Dartmouth Hitchcock Medical Center, Hanover, NH, USA.  
*Presented at Society for Pediatric Anesthesia 2010.*

**Cerebral oximetry in a newborn with hypoplastic left heart and restrictive atrial septum from birth to atrial septostomy.**  
Children’s Hospital at Vanderbilt, Nashville, TN, USA.  
*Presented at Society for Pediatric Anesthesia 2010.*

37. Mann H.  
**Stable intensive care nursery infants’ cerebral oxygenation in supine versus prone position.**  
Duke University Medical Center, Durham, NC, USA.  
*Presented at 5th International Conference of Brain Monitoring & Neuroprotection in the Newborn.*

**Neonatal cerebral oximetry monitoring in preterm infants with RDS.**  
Children’s National Medical Center and The George Washington University School of Medicine, Washington, DC, USA.  
*Presented at 5th International Conference of Brain Monitoring & Neuroprotection in the Newborn.*

39. Fenik JC, Rais-Bahrami K.  
**Neonatal cerebral oximetry monitoring during ECMO cannulation.**  
Department of Neonatology, Children’s National Medical Center, Washington, DC, USA.  

**Cerebrovascular reactivity measured by near-infrared spectroscopy.**  
Department of Anesthesiology and Critical Care Medicine, Johns Hopkins University School of Medicine, Baltimore, MD, USA.  

41. Benni P, Chen B, Fenik, J et.al.  
**Cerebral and pulse oximetry monitoring of newborns: clinical observations.**  
CAS Medical Systems, Inc., Children’s National Medical Center, Washington, DC, USA.  
*Abstract of a Poster Presented at the International Symposium on Innovations and Advancements in Monitoring Oxygenation and Ventilation (ISIAMOV 2007).*
