Introducing TrueVue™ DOPPLER

The ‘go-to’ technology for beat-to-beat ultrasound imaging of cardiac output. The easiest to learn, simplest to use haemodynamic imaging technology ever.

“Medically necessary for monitoring of cardiac output in persons with a need for intra-operative optimisation”

- 180 measurements a second to build
- Doppler image of flow every heartbeat
- Cardiac function biomarkers
- Diagnostic power and reliability for your most complex cases
- Proven effective for optimisation using >10%SVO method.

Innovative Focus System

TrueVue Doppler now has the widest ever ultrasound beam for easy focusing.

- Measure Flow Directly - Stroke Distance, Flow Time, Peak Velocity
- Monitor Change Precisely - Preload, Afterload, Contractility
- Manage Haemodynamics Confidently - 10%SVO, Compliance, Inotropy

- Pressure based continuous monitoring option
- Easy calibration and recalibration of arterial pressure based method of cardiac output
- Supports Doppler during periods of diathermy and extends use into postoperative recovery and critical care.
One TrueVue™ SYSTEM three best in class technologies - right technology, right monitoring, right intervention for the right patient.

Myocardial injury is the leading cause of postoperative death and the third leading cause of death overall in the United States

Cleveland Clinic Researchers (Clinical Anesthesiology 2016)

Monitoring is the key to informed risk assessment to avoid covert cardiac injury.

Your patients, your choices

Haemodynamic Risk Assessment

Negligible Risk

Moderate Risk

High Risk

MONITOR

Choose best suited TrueVue technology to MONITOR haemodynamics

INTERVENE

Choose best suited TrueVue technology for INTERVENTION with fluid or drugs or both

Signs of Haemodynamic stress?

Yes

No

Haemodynamic marker(s) high or low?

Yes

No

Haemodynamic marker(s) high or low?

Yes

No

One Platform
Three Technologies

A world first from the world’s most innovative haemodynamic monitoring company.

- Complete Haemodynamic Platform
- Best in Class Technologies
- Real Time Biomarkers.

TrueVue™ System, the first to combine three ‘Best in Class’ technologies, into one platform.

Clinicians can now choose the most appropriate technology for each patient. Newborn to adult, awake or anaesthetised, across all hospital settings.

Choose expert support

Expert clinical support and training
– bedside, classroom and online
– Deltex Medical App.

Business case and implementation support
– modern perioperative patient safety, quality improvement projects and enhanced recovery roll-out.
